Security Camera Solutions

Our services are tailored to provide you with comprehensive coverage, real-time monitoring, and advanced features.

Here's an overview of the services we provide:

System Design and Consultation

We consider factors such as layout, lighting conditions, and areas of vulnerability to ensure optimal coverage and maximum effectiveness.

High-Quality Camera Installation

We provide professional installation of high-quality security cameras to capture clear, detailed footage.

Network Video Recording Systems

We deploy cutting-edge Network Video Recording (NVR) systems to store and manage your surveillance footage.

Remote Monitoring and Mobile Access

Our security camera systems enable you to monitor your premises from anywhere, at any time.

Integration with Access Control

We seamlessly integrate your security camera system with access control systems to provide a comprehensive security solution.

System Maintenance and Support

Our dedicated support team provides ongoing maintenance, updates, and technical support for your security camera system.

Why Remote Techs?

In short - reliability. We install commercial-grade security camera systems that business owners can rely on. Regardless of your industry or size, you just need to know that your camera system did its job. We have installed all types of camera systems; indoors, outdoors, high off the ground, under-ground, wired, and wireless. We are focused on learning what you need your camera system to do, and from that dialogue comes the perfect system for your business.
