Security

INFORMATION SECURITY IS IMPORTANT:

1. You have sensitive information
2. You allow data to be accessed outside your office
3. You have more than one password to remember
4. You have more than one person working in your company
5. You care about your business...

CALL US TODAY

CYBER SECURITY SERVICES

Welcome to Remote Techs, your trusted partner in Cyber Security. At Remote Techs, we are dedicated to protecting your valuable digital assets and ensuring your online presence remains secure. Our comprehensive range of services is designed to safeguard your business from ever-evolving cyber threats.

Penetration Testing

Our experienced team conducts thorough vulnerability assessments to identify weaknesses in your network infrastructure, applications, and systems.

Managed Firewall Solutions

Our cutting-edge firewall solutions provide a robust barrier between your internal network and external threats.

Advanced IDPS

Our advanced IDPS solutions actively monitor your network, detecting and preventing unauthorized access, malicious activities, and potential breaches.

Security Incident Response

We follow industry best practices to contain the incident, assess the damage, and restore normalcy as quickly as possible.

Data Loss Prevention

Protecting your sensitive information is paramount. We employ robust encryption techniques to secure your data both at rest and in transit.

Employee Security Training

We offer comprehensive training programs to educate and empower your workforce in recognizing and mitigating potential risks.

WHY REMOTE TECHS?

We know how to protect you from the threat of losing data, money, sleep and potentially your business. Our security specialists have been educated on the latest threats and technologies you should be using to protect your business.

If you are unsure about the security of your data, then call Remote Techs and schedule a review of your security systems. Our solutions get you to a place where you can confidently sleep at night knowing that your data is truly safe.
