

# Policy & Procedures / Training

## THESE ARE VITAL FOR YOUR BUSINESS:

- Diligently help prevent cyber attacks
- Measure employee performance
- Train your employees on best practices and how to avoid scams
- Establish uniformity with regard to your employees' rights and responsibilities in using your business' technology and data
- Control the access your employees have to sensitive data and equipment

## Policies & Procedures that align with your business goals and industry regulations

Here's an overview of the services we provide:

### --- Risk Assessment

We conduct a thorough assessment of your existing infrastructure and identify potential vulnerabilities and areas of weakness.

### --- Policy Development

These policies outline guidelines, best practices, and protocols to mitigate cyber risks, including incident response procedures.

### --- Security Framework Implementation

We conduct a thorough assessment of your existing infrastructure and identify potential vulnerabilities and areas of weakness.

### --- Employee Awareness Training

We provide engaging and informative training sessions to educate your employees about various cyber threats and preventive measures.

### --- Incident Response Planning

Our team assists you in creating a detailed plan that outlines the steps to be taken in the event of a breach, including containment, analysis, eradication, and recovery.

### --- Compliance Assistance

We help you navigate complex regulatory requirements and ensure your organization remains compliant with relevant data protection and privacy laws.

## Why Remote Techs?

Someone once said that processes don't fail, people do. We disagree because there are plenty of ill-fitting processes out there. Policies, procedures, and training need to be at the heart of any organization, and they need to fit the organization's mission and objective like a glove. We have designed technology for so many different companies, with such a wide variety of industries, and we've seen some scary things happen. Working with us lets you leverage our unique perspective and experience to make your company stronger and more secure.
